# TORQUE MOTOR ROTARY TABLE

INDUSTRIE 4.0 Best Partner

# Product Description

## Torque Motor Rotary Table

HIWIN offers various types of Torque Motor Rotary tables.

Torque Motors with water-cooling systems can achieve both high acceleration and high torque. Integrate with high rigidity, high precision bearings, an absolute encoder and a powerful clamp makes HIWIN Rotary tables the high-performance solution.

## Torque Motor

HIWIN Rotary Tables feature torque motors with similar torque and higher acceleration compared to worm gears and roller cam systems.

Using a water-cooled torque motor not only reducing thermal deformation, but also increases working torque achieving high dynamic response and higher precision.

With zero backlash and zero wear, the torque motor can improve the reliability of the rotary table.

· Suitable for a variety of five-axis machining centers

### · Modular design

The structure is simple, with high reliability.

### · Easy replacement

Table supports a variety of applications. Table size and pattern can be adjusted according to customer's requirements.

· High speed  
· High rigidity  
· High positioning accuracy

### · High productivity

Excellent dynamic performance for increased efficiency.

### · Long service life

Simple structure, zero backlash, high stability.

## RAB Series

### FEATURES

- Rigid and symmetrical mechanical design.
- High acceleration, high torque, high precision and zero backlash torque motor.
- Powerful built-in clamping system.
- Both rotary and tilting axis use large bore diameter, high precision ,high rigidity bearing.
